PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Any previous CXRs/ CT chest in previous hospitals Information about CT chest not given as the CT only will help to diagnose military TB early. More info on if ultrasound abdomen has been done or not. Information about LFT and smear. Values of Immunoglobulin profile and T and B cell markers are needed. LJ medium culture ig gold standard but it takes time. Liquid cultures are advised by WHO- MGIT culture- done or not has not been revealed. More information in the discussion is needed on the primary immunodeficiency and if they have made it out as SCID or not as child has both fungal and bacterial infection. The diagnosis and discussion of PID has been conveniently forgotten. This may have been the tilting point to the child dying.</p> <p>Information about whether they were able to identify the source of contact within the family has not been given.</p>	
Minor REVISION comments	<p>The language grammar needs improvement. I have also recommended many in my comments</p>	
Optional/General comments	<p>Difficult to diagnose but a good case.</p>
