

Review Form 1.6

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_79993
Title of the Manuscript:	Demographic and Serum Alanine Aminotransferase pattern of primary Health Care Workers positive for Hepatitis B Surface Antigen and Hepatitis C Virus in Cross River North, Nigeria
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Abstract:</p> <ol style="list-style-type: none"> 1. Method part needs modification it does not well stated. Is that probability vs. non probable sampling? 2. Result also indicates that only descriptive part. Where are the inferences? <p>Methods</p> <ol style="list-style-type: none"> 1. Please clarify the sample size determination. 2. Elaborate on the lottery method, why was this done? And elaborate on the random sampling technique, why and how was this done? 3. Generally this part needs major modification <p>RESULTS</p> <ol style="list-style-type: none"> 1. What was your response rate? 2. Table 2; Attitude of subjects toward Hepatitis B and C Virus but it talks about Knowledge, and Exposure to accidental needle which is difficult to understand 3. Your topic is on "Demographic and Serum Alanine Aminotransferase pattern" but where was the pattern? 	
Minor REVISION comments	<p>Conclusion: based on what your result as significant?? What were your evidences?</p> <p>Introduction:</p> <p>The introduction is more an enumeration of information than a introduction to the subject and research questions. Please concisely describe the context for your research work and highlight how it contributes to the knowledge in the field and how it builds on previous similar studies.</p> <p>RESULTS</p> <p>There were many grammatical issues, reputation of the information on able and figures</p>	
Optional/General comments	<p>Thank you for the opportunity to review this manuscript on Demographic and Serum Alanine Aminotransferase pattern of primary Health Care Workers positive for Hepatitis B Surface Antigen and Hepatitis C Virus in Cross River North, Nigeria. The title is very interesting, however, there a some very important methodological issues. Also, the manuscript lacks a clear description and is sometimes hard to read and understand. The manuscript would benefit from English editing, improved methodology and a clear presentation of the methods and results.</p>
