	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Expand the introduction section – the background section is very weak. Need more info on why malnutrition is detrimental to these patients? English editing required.	
Minor REVISION comments	Discussion section – inefficient use of subheadings – try to re-write and re-structure this section for a better flow. Might be good to include study strengths and weakness.	
Optional/General comments	Good and clear abstract. Page 3 – Results: separate into separate paragraphs, the current paragraphs was too long. I think the manuscript written quite well, just need some improvements, particularly the introduction section – need much more info.
