Manuscript Number:	Ms_JAMMR_80989
Title of the Manuscript:	The effect of fat emulsion intralipid infusion on reproductive outcome for women with unexplained first trimester habitual abortion
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy> )

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The study is a good study but the standard of English writing is below the standard for good English writing and I have made supporting improvement changes which the authors should reflect upon and if they agree they could incorporate as corrective changes in addition to answering questions or making corrections to areas I have highlighted in red. In addition the writing of the references should be consistent and I have made corrective additions which are highlighted in yellow as well as there are additions highlighted in red to be found and added to complete the reference writings. Those who should be acknowledged should be acknowledged. If the changes that I have suggested are accepted then there would not be too much of a revision to undertake apart from my other suggestions before the article can be published.	
<b>Minor</b> REVISION comments	See above	
<b>Optional/General</b> comments	Please the article is good please encourage the authors to make the necessary corrective changes.
