PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | <ol style="list-style-type: none"> For figure 1 and figure 2, I recommend adding hazard ratio with 95% CI as well. It seems that older people in the study received more curative operation instead of no operation on table 2. I think the Authors can expand the discussion by speculating why older people receive more curative operation. Also, the Authors can compare with other literatures | |
| Minor REVISION comments | <ol style="list-style-type: none"> I'm not sure whether image 1 (map of Uganda) is necessary to be included in the manuscript. | |
| Optional/General comments | <p>The manuscript is well written and methodologically adequate. Introduction, method, result, and discussion section do not have any issues. English language of the manuscript is adequate</p> <p>There are some weaknesses and bias in the study but this is mainly due to the retrospective design of the study. The Authors have written the study limitations on the manuscript.</p> | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|--|---|
| Are there ethical issues in this manuscript? | <i>(If yes, Kindly please write down the ethical issues here in details)</i> | |
