Compulsory REVISION comments	<p>I estimate that this article is very interesting. It seems to me that the topic is current and important for Uganda, the retrospective study is methodologically well planned and done with very nice statistics and the conclusions as well as the study limitations and strengths in the article are good described.</p> <p>I think the article is acceptable for publication.</p>	
Minor REVISION comments	<p>On the fifth page in the eleventh line where the sentence starts with "Among the colonn cancer patients" it seems to me that the numbers are somewhat inconsistent, the percentages are not 100%. Maybe I didn't understand well what the author meant or he didn't write clearly enough.</p> <p>I really liked everything else in the article and it seems that the article was written by someone very experienced.</p> <p>Congratulations to the author on a well-done study.</p>
