PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>Great article, I enjoy the subject and the statistics that support it The author applied a logistic regression model to explain the relation (odds) of known factors explored at the survey with the outcome of "under 5 death". The under 5 death at the sample was not reported, neither was the collinearity (mothers with <18, might have low scholarship and low number of previous childrens because of their low age) At the demographic characteristics of the sample, the majority of the women were older than 20, have education level higher than primary, are married and the father has a job... Are those findings similar to what we expect for the Nigerians, this would be of great value at the discussion for external validity.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
