	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>I didn't find the study aim described in the manuscript, not in the abstract and not in the text for example, in the material and methods section!!!!</b></p> <p>1) Abstract: must need to include the study's aim.            2) Abstract: in materials and methods need to clarify what is the event that will be evaluated and how!!!            3) Suggestion: when the authors present the results write the percentage in the text and the "n" in parenthesis, I think that is a better way of presenting results.            4) Always use the same number of decimals, in all the manuscript, even in tables.            5) In the Materials and methods section, must have to include 3 subtitles: Aim or objective, Sample (before the text when explain who the sample was calculated) and Data collection (when presented the tool that was used).            6) In the subtitle Sample, it</p>	
<b>Minor</b> REVISION comments	<p>7) Abstract: in results DFU acronym first presentation, not with words...            8) Abstract: in results "61 of them being men" or "61 male"??            9) In the title of table 1, replace "respondents" for "patients" as in the other tables.            10) In the table 5 include in the legend what was the statistical test applied for the pvalue present.</p>	
<b>Optional/General</b> comments
