PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<u>01</u> Most of the Discussion section consists of paragraphs beginning with a repetition of the results followed by the citation of the results of other studies, without an actual discussion of the findings of the study. <u>02</u> "These findings confirm that MIPO can achieve functional and clinical outcomes that are highly comparable to routine ORIF while posing a significantly lower risk of postoperative complications." This is not a conclusion of your study, since patients in your cohort groups were not treated with routine ORIF. Stick your conclusions to your findings, not to data from the literature, as this manuscript is not a literature review.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
