Manuscript Number:	Ms_JAMMR_88873
Title of the Manuscript:	Effect of a Slow-firing Method on Porcine Small Intestine: Evaluation of Staple Malformation by Two Different Methods
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	This study is very interesting. This work is technically sound. Authors have reached definite outcomes which are based on their own experiments. Basic statistical tests were used. The approach is optimal for this data set. This work has been tailored with available literature. But minor language polishing needs to be done, for example, ' Tabale 1' in the table legend. I appreciate this work which would be greatly useful for surgeons to reduce post operative complications. You may consider this for publication.	
<b>Optional/General</b> comments	Grammar should be reviewed Check proof reading of the article	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
