PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article focuses on a unique problem in thyroidology that is the effect of palpation of thyroid gland on the hormone levels. But the sample size of the study is so small and is incapable of drawing conclusions. The authors are requested to increase the sample size of hyperthyroid patients because they are the one where free t4 levels may rise after palpation as some hyperthyroid patients have gone into thyroid storm after vigorous palpation.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
