### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	This study is important in that it evaluated cognitive function in patients with COPD. However, methodologically, it is desirable to have a control group. If one wants to show that respiratory function may affect cognitive function, this design says nothing. However, the argument that attention should be paid to cognitive function is important.	
<b>Optional/General</b> comments
