### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	As there is a paucity of data from Africa it is an interesting study. Authors should define statistical methods in the methods section. Moreover they should define how many patients were receiving every NSAID type and for how long In addition they should they measured blood pressure and under which conditions For anemia it would be interesting to know the level of Hb change in time How many medication and for how long they received to control blood pressure is needed Had the authors performed an utrasound of kidneys and if not why. Had the patients the same tenency to develop hypertension as the controls	
<b>Minor</b> REVISION comments	In the methods section the definition of diabetes is irrelevant as diabetics were excluded Data appearing in tables should not be repeated in the text as just a precis is enough	
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
