PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Better to use sample size than amount of sample . No clear statistical correlations in this study.	
Minor REVISION comments	The title must include the ward adult to be: Cytokines (IL-17, IL-23 and IL-33) in Systemic lupus erythematosus in Adult Trinidad and Tobago.	
Optional/General comments	It's Better to use statistical measure like x square test to compare results. The conclusions of high percent of lupus patients had high IL 13,22 looks biased cause the author didn't explain whether the patient included in this study were treated or not with Mmunosuppressive therapy. This is definitely affect the cytokines levels.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
