PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It is an article that presents the subject of study in an orderly manner. It has an adequate introduction, the methodology is simple and clear Although the results were predictable, they are supported by some radiological images in relation to the methods used to visualize the mandibular canal. The discussion is scarce and does not address the research topic in depth, there is no allusion to the limitations of the study and the clinical importance of the study is not delved into. The conclusion agrees with the results presented. It is suggested to extend the discussion by comparing results with others obtained from other article reviews.	
Minor REVISION comments		
Optional/General comments
