PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>This manuscript is helpful for clinicians to understand control programs targert of Malaria and HIV infection Unfortunately, There are so many grammatical mistakes that readers misunderstand the meaning of the manuscript, such as Malaria and HIV co-infection among COVID-19 Cohort in Selected Healthcare Facilities in Rivers State Nigeria → Malaria and HIV co-infection among the COVID-19 Cohort in Selected Healthcare Facilities in Rivers State, Nigeria</p> <p>Data were basically primary sources however; secondary sources were used as well. → (make it fluent) The majority of the data came from primary sources, but secondary sources were also used.</p> <p>Both males and females had equal chances of participation provided they were found within the selected facilities. → (make it simpler, this sentence is too complex) Men and women had the same chances of taking part, as long as they were in the selected facilities.</p> <p>This was the sample size used and involved recruitment of four hundred (400) patients from the selected healthcare facilities. → (make it simpler, this sentence is too complex) This was the size of the sample, and 400 patients from the chosen healthcare facilities were asked to take part. This manuscript needs to be polished.</p>	
Optional/General comments
