Compulsory REVISION comments	<p>The aim of the study was to investigate the effect of different levels of alternative substrate of cupuacu bark on the biometric and physiological characteristics of yellow passion fruit. The manuscript is relevant for publication. The introduction is well written and conceptualizes the reader about the problem of the study. The MM is adequate, the results and discussion are appropriate, as is the conclusion. However, I suggest that minor adjustments are made before recommending it for publication.</p> <p>My comments and suggestions are present in the manuscript in review mode.</p>
