PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>I thank the editor for the invitation and the authors for the research carried out. The Introduction section contains the basic information about the topic of the research in the light of current literature, which paves the way for the disclosure of the objective of the paper. The methodology section tells us clearly how the authors went out doing the research. Include enough detail for others to repeat the experiment if they want. At a statistical level, the results are in line with the objectives of the study and are clearly presented for readers of any research area. The discussion of the results explains their importance and what they mean.</p> <p>The only criticism I present is the need for authors to indicate in the text the identification of the table from 1 to 5 that must be included in each subsection of the results.</p>	
Optional/General comments
