PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article has a good theoretical basis, awesome execution of ideas in its development, the study of variables is in accordance with the proposed objectives, excellent data stratification. The objectives of the study are clear, a conclusion consistent with what was proposed by the authors. Just a doubt, these audited annual accounts of ten food and beverage industries listed on the Nigeria stock exchange, which cover a period of six years, are not very clear to me, why were they chosen? how relevant are they to the country or region? I advise you to describe the reason for the choice, and remember the techniques are perfect, I just suggest describing the reason for choosing these industries, it can be described in the abstract or worked on the methodology, just to clarify the reader. Excellent job.	---
