PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The paper has a relevant contribution by providing an overview of the literature on a topic that could be helpful for future researchers. Notwithstanding, I would suggest to the authors highlight the findings on methodological aspects. For instance, there is one single paragraph at the end on this aspect, which is a mix of models and technics used. Finally, despite the overall quality of the text, a final revision could be useful to avoid some mistakes. For instance, this is not a complete phrase: "While the Altman model (1968) examines two or more variables at the same time and assumes a multivariate normal distribution and variance-covariance metrics."	
Optional/General comments		

PART 2:
