Journal Name:	Journal of Engineering Research and Reports
Manuscript Number:	Ms_JERR_81012
Title of the Manuscript:	Multilayer Optical Waveguides As Isolators, Polarizers And Other Optical Devices : A Review
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> No doubt the authors have classified multiplayer optical waveguides in appreciable manner. However lack of diagrams makes it difficult to understand.(e.g. use of symbols such as W_C, W_F and W_{RL} do not any sense with out diagram). I recommend use of diagram in each section. Working principle of isolation, polarization, etc. in each case needs to be quite clear 	
Minor REVISION comments	<ul style="list-style-type: none"> There are some typos/ English errors 1. Para 2 of abstract " we investigate" can be replaced by we have investigated" 2. Section 5 para 2 the "The integratable". I doubt this is right word 	
Optional/General comments	The authors have provided good review of Multilayer Optical Waveguides for different applications such as isolators, polarization control, etc. The authors have mainly focussed on the reporting the works that has been done previously by other research in this field. The author may include the above suggestion, to make the article more coherent and easy understandable.
