

Review Form 1.6

Journal Name:	Journal of Engineering Research and Reports
Manuscript Number:	Ms_JERR_84811
Title of the Manuscript:	ANALYSIS OF MECHANICAL PROPERTIES OF LONG-SPAN REINFORCED CONCRETE COMPOSITE SLABS UNDER DIFFERENT SPLICING METHODS
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljerr.com/index.php/JERR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	1. The types A and B are almost equivalent in this study, but they are not prestressed components. According the conclusions, what is the minimum and maximum spans for types A and B to be equivalent, respectively ? It is recommended to give the values based on this case. 2. In section 1, "our company" should be changed to be the project name. 3. There are some spelling mistakes or missing, such as "differentsplicingmethods", " $f_{t,r}$ and $f_{c,r}$ respectively represent the representative value of concrete uniaxial tensile strength". 4. The variables, such as Point A, d_t and d_c , should be written in italic. 5. Some of the references are incomplete.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
