### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The paper needs proof reading for better reading of the text. The introduction was okay. The Literature review was missing from the paper. Literature cited were not up-to-date and newer citations can provide more substance to the literature. Explanations in the methodology was brief and in point forms – a little more detail would have been appreciated. In the results and discussion, it is suggested that data analysed could be put into charts and figures for a clearer understanding of the results. Numbering systems in terms of formatting are also in question.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	Generally, the paper can be improved with a more analytical take in terms of data presentation and literature review.	

### PART 2:
