PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Abstract: This should be summarised into a single paragraph highlighting the objective of the study, the scope, sample, results/findings, and conclusion.	
Minor REVISION comments	Hypotheses: There are only 2 hypotheses in this study, I am not sure these 2 alone will address the 4 objectives of the study. Maybe an additional hypothesis should be added to respond to the interaction effect of intimate partners violence, willingness to disclose IPV and age of the women	
Optional/General comments	IPV is an interesting area of study that unveils a silent but salient global public health problem that still needs a lot of research to unearth. A lot of people especially in this part of the world are suffering IPV in silence due to so many reasons bothering mostly on culture, religion and fear of stigmatization	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
