PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. The authors lead readers to think that self-efficacy is a predictor of career aspiration as shown in the title. The theoretical basis shows doubts about whether self-efficacy is related to career aspiration or not. Suddenly, the author propose a pessimistic tone about the relationship and states that the two variables are not related as specified in the hypotheses. The authors need to put a strong emphasis on why they ultimately choose that the two are unrelated. 2. The word predictor in the title reflects that the authors used causal analysis techniques. In fact, they use correlational method. I suggest that the authors change the title, for example: Does self-efficacy have a relationship with career aspiration? A Study among Secondary School Students in Anambra State. 3. Please add the definition of achievement career aspiration and leadership career aspiration. 4. Check typos. 	
Minor REVISION comments		
Optional/General comments
