PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The papers is publishable after some revision. The specific objectives should be mentioned in addition to the general objective. The objectives of the paper are on analysing and predicting. The analysis part is well covered but there is no prediction. The authors should revise the paper to remove the mention on prediction. Methods need to be described in more detail. Results and discussion should be presented under section titles emanating from the specific objectives of the study. The conclusions should base on results and not like they are now (they are on use of GIS, which would be OK is this were a methodology paper, which is not the case).</p>	
Minor REVISION comments		
Optional/General comments	<p>If possible, RESULTS should be separate from DISCUSSION. That gives better treatment of each of the two sections.</p>
