

**Review Form 1.6**

Journal Name:	<a href="#">Journal of Geography, Environment and Earth Science International</a>
Manuscript Number:	Ms_JGEESI_76907
Title of the Manuscript:	Hydrocarbon Reservoir Characterisation of 'Khume' Field, Offshore Niger Delta, Nigeria
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<p>The author has sufficient material for his study, the data, the problems description, and the arguments are correct. The data characteristics of the oil field wells are in accordance with the oil and gas extraction methodology and procedures. The estimation of oil reserves by the deterministic method is correct. The reason for using intensive methods is appropriate in the case of oilfields that are in production decline. The article is suitable for publication, with some improvements related to improving the article format according to the template, correcting grammatical errors, and correcting the references, using word references or Mendeley.</p> <p>The author should present the volumetric formula of reserve estimation, because he has done that and he has presented the result.</p> <p>The author should use some more updated references, let's say, after the year 2017, he can use this link;  <a href="https://scholar.google.com/scholar?hl=en&amp;as_sdt=0%2C5&amp;q=Hydrocarbon+Reservoir+Characterisation++&amp;btnG=">https://scholar.google.com/scholar?hl=en&amp;as_sdt=0%2C5&amp;q=Hydrocarbon+Reservoir+Characterisation++&amp;btnG=</a></p> <p>The references should be taken from google scholar, APA style is a choice.</p> <p>The author may find useful references within the journal he aims to publish; it is good for the journal, too.</p>	
<b><u>Minor</u></b> REVISION comments	<p>I suggest the author download the Grammarly add in for word because there are many grammar errors.</p> <p>That will be very helpful to him.</p> <p><a href="https://www.grammarly.com/office-addin">https://www.grammarly.com/office-addin</a></p>	
<b><u>Optional/General</u></b> comments	<p>The article is generally suitable for publication. The author has done a great deal of research and knows the problems very well, has sufficient data and accurate interpretation of issues. Plagiarism is at an acceptable level, less than 10%.</p>	

## Review Form 1.6

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
