

## Review Form 1.6

Journal Name:	<a href="#">Journal of Geography, Environment and Earth Science International</a>
Manuscript Number:	Ms_JGEESI_86810
Title of the Manuscript:	Formation of Mountain Ranges
Type of the Article	Short communication

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalgeesi.com/index.php/JGEESI/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	At this point, it becomes obvious to me that the author is not following the scientific method. Even if his ideas about the formation of mountain ranges were right, which appears to me quite debatable, he is following a pseudo-scientific manner of presenting them. He should include references and opinions of other researchers about his previous works, to support his ideas. In summary, I think that this kind of material should not be published as presented	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	This reviewer carefully considered the whole manuscript. I enclose a couple of examples of what I consider inadequate pseudo-scientific arguments. I regret to have to dismiss the article, but I don't see how this approach could be scientifically justified.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
