PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Abstract: Abstract is not written well. Important things are missing. Authors should start with background of the study then problem statement then objective then method, results and lastly conclusion.</p> <p>Introduction: Authors should also write more about plant chemical constituents, which might show anti-inflammatory effect.</p> <p>Method: Why are these mentioned doses selected? Plant species name should start with small letter. Authors are also advised to recheck this in whole manuscript</p> <p>Results: Authors should incorporate some pictures of phytochemicals screening test results.</p> <p>Disussion. Authors should incorporate some more recent studies and can compare current finding with already published data. Recent studies are missing in the manuscript. Apart from this, sentence construct is very poor. Writing needs to improve. Full stop is also missing at sentence end at some places. Authors also need to re check the references.</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
