PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>-It is an interesting work, however, the title and especially the objective cause initial confusion. It is understood that they searched for publications about post-covid patients with facial paralysis, but it was an analysis of acupuncture and Bell's palsy research without association with covid. It is important that the title and objectives are completely clear.</p> <p>An example of a title for this paper might be: Acupuncture for Bell's Palsy, review. Will it be a therapeutic option for Bell's palsy in postcovid patients?</p> <p>-There are paragraphs with identical text of some investigations. Although the reference is registered, it would be convenient to paraphrase the text. Review the entire document.</p>	
Optional/General comments
