Review Form 1.6

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|--|
| Compulsory REVISION comments | <ul style="list-style-type: none"> • I have reviewed this paper from a scientific/technical perspective, and while doing so have also reviewed the language and syntax. Therefore thorough editing of the whole manuscript is recommended <ol style="list-style-type: none"> 1. Introduction <ul style="list-style-type: none"> • This sentence should be reconstructed to improve meaning: <i>By limiting face-to-face contact among physicians and One still living, the utilization of effective consideration arrangements can help the transferal of the infection and shield clinical consultant from illness. E.g By limiting face-to-face contact among physicians and patients, the utilization of effective consideration arrangements can help to reduce the transmission of the infection and shield clinical consultants from illness.</i> • Theoretical description of what is telehealth from the beginning will provide a better understanding of the article to the readers • This is a review article with limited in-text referencing e.g. <i>For instance, the West China Hospital as a team with China had the option to give far-off clinical treatment using 5G innovation. Moreover, reacting in this emergency, the National Telehealth Center of China (NTCC) situated in, which was a telehealth-based flare-up alarm and reaction framework. Related to Huawei Technologies and China Mobile is the NTCC utilized workgroups to disconnection wards. They helped arrange Telehealth gear and organizations. NTC physicians and One still living with prompt interviews and analysis, in regards to CORONA VIRUS 19.</i> 2. Methods <ul style="list-style-type: none"> • A heading to indicate the methodology used should be added e.g the last two paragraphs before the findings 3. Discussion <ul style="list-style-type: none"> • Authors need to focus on the discussion of which in this case is too brief, they should indicate the gaps identified, implications • The discussion lacks engagement with the findings and with the literature. • Authors to discuss the patterns, principles, and relationships shown by each major findings and place them in the proper perspective • a closing paragraph or two with summative insights or overarching principles garnered from this paper would make the manuscript more complete | |
| Minor REVISION comments | | |
| Optional/General comments | <p>The authors should be commended for undertaking a review study regarding the use of Telehealth for the COVID-19 Pandemic. The health care field as a whole</p> | |
