PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p style="text-align: center;">Anthropometric Analysis of Human Knee Joint in Indian Population</p> <p style="text-align: center;">Manuscript number: Ms_JPRI_71204</p> <p>The objective of this protocol study is to calculate the anthropometric distal femur parameter and determine the distal femur variations on the right and left side of the morphometric measurement and to evaluate dimension of current TKA as related to Indian population.</p> <p>The approach of the protocol study appears very original and the contents of the manuscript are quite interesting by his methodology and through the tools of quantification used.</p> <p>The manuscript reads smoothly and is easy to understand. The aims, scope, and results of the study are clearly stated. I have very much enjoyed reading this paper. I find it interesting and clearly written, and satisfying also all the other publication criteria of the "Journal of Pharmaceutical Research International". The study provides a very valuable addition to this line of research, and adds relevantly to the subject with additional original findings. I thus find that this paper definitively delivers results that will surely be of interest to the readership of the "Journal of Pharmaceutical Research International". I recommend the publication of this interesting protocol paper. The authors must give the ethical committee number</p>
