

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_71274
Title of the Manuscript:	The Effects of Plasma Exchange on Diffuse Alveolar Hemorrhage in Severe Vasculitis – A Case Study
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Excellent management. Thank you for the careful patient management as well as for taking the time to write the case report.</p> <p>In the introduction of the abstract put the acronym DAH next to alveolar hemorrhage. Spell it as Diffuse Alveolar Hemorrhage (DAH). I suggest rewriting the introduction of the abstract as 'Widespread diffuse alveolar hemorrhage (DAH) and Rapidly Progressive Glomerulonephritis (RPGN) are complications of ANCA associated vasculitis (AAV).'</p> <p>Put a space between had and features in the first sentence of the case presentation of the abstract. Replace patients with the patient in the third sentence of the case presentation of the abstract. Put a space after 'p-ANCA report.' before the final sentence of the abstract. Similarly, make sure to have a space after every period for all sentences.</p> <p>Include the patient's age in the case presentation after the introduction of the abstract</p> <p>Pulmonary renal syndrome should be spelled as 'Pulmonary renal syndrome' in the Introduction section's first sentence.</p> <p>Mention that the kidney biopsy could not be obtained due to the family's preferences in the abstract.</p> <p>Please rephrase the conclusion of the abstract as 'It is pertinent to note the importance of immediate intervention by Therapeutic Plasma Exchange in potentially fatal Diffuse Alveolar Hemorrhage in AAV.'</p> <p>Change Serology to Serology in Table 1. Similarly, make sure to run a full spell check of the document.</p> <p>3rd Day of admission: In addition to hemodialysis and maintaining euvolemia, intravenous methylprednisolone pulse therapy was administered 500mg every 24 hours. -> replace this with 3rd Day of admission: In addition to hemodialysis and maintaining euvolemia, intravenous pulses of 500 mg methylprednisolone were administered every 24 hours.'</p>	
Minor REVISION comments	<p>Include a space after the left side period in this phrase before the discussion of the 5th day: 'infiltrates bilaterally more on left side. With this we made diagnosis of AAV, microscopic polyangitis with RPGN and diffuse alveolar hemorrhage.' and replace the beginning of the same paragraph's 'On next day...' with 'On the next day...'</p> <p>Mention which test was done to rule out multiple myeloma.</p>	
Optional/General comments	<p>Clearly specify that the dialysis was initiated due to the elevated creatinine.</p>
