

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_72182
Title of the Manuscript:	COMPARISON OF EFFICACY OF PRELOADING WITH 0.9% NORMAL SALINE WITH PREMPTIVE DOSE OF EPHEDRINE FOR ATTENUATION OF HEMODYNAMIC RESPONSE DURING PROPOFOL INDUCTION
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In the introduction, the objective is not well established. The verb "to compare" is not adequate, because it is implicit in a research with several study groups. In the method, must declare the classification of the study and the universe, in addition to the statistical techniques and the ethical processing of the research.	
Minor REVISION comments	I recommended to do a structural abstract. Description table 1: review, when the value of "p" is less than 0,05, the value is significant and the author says otherwise in the manuscript. There are not enough comparisons of the results obtained.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
