PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	May be accepted but after major corrections. The work is very much conventional and there is no novelty. Only in-vitro study is carried out. As per the title of the article 'pharmacological study' is not at all justified. So the title may be changed. Also the in-vitro antioxidant study is needed to be modified by including some more parameters like; ABTS, Ferric Reducing Capacity, etc.	
Minor REVISION comments	Animal study can be done for few days like 1 month and the histopathology evidence can be added to the article to confirm the in-vitro results.	
Optional/General comments	General spell check can be done and grammarly application may be followed to avoid any error.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
