### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	Second sentence of the 2 <sup>nd</sup> paragraph in the Introduction section. What is ADL? Second paragraph of page 2. It is hard for me to understand the idea of the paragraph. Few first sentences are confusing. I think the author(s) need to reorganise the sentences. Checking similarity with Turnitin, I found its similarity was 22%. I suggest the author(s) to revise the text to decrease its similarity level.	
<b>Optional/General</b> comments	I see the author(s) presenting the characteristics of participants in three places, namely in the methodology, in the results, and in the discussion. Do you have a specific purpose regarding this? I think the findings of the study is valuable to scientist and practitioners who concern with human body strength in many situations and applications	

### **PART 2:**
