PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I have some suggestions: 1) The patient's name should not be on the text (Mr. Suraj) 2) When first described, the word should not be contracted (AVBRH). If this is a name of a space, Hospital, I suggest using "Admitted to a Local Hospital" and not using the real name. 3) Please correct the Title: Delirium Tremens	
Minor REVISION comments	I suggest developing more the patient present history and using this space to describe all the hospitalization. I suggest discussing more about the treatment. There are some parts (Nursing management and USG) that the written should be revised in the way to let the text to be more understandable. There are double written words/phrases. The USG part could be written in the patient present history.	
Optional/General comments	Thanks for submission. This is a case report of a Alcohol Dependence with Delirium Tremors. The author presents a introduction, case report, discussion and conclusion. This case report has importance in the general medicine.
