PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>The authors of the manuscript KNOWLEDGE, ATTITUDE AND PRACTICE STUDY ON EFFECTS OF SMOKING, ALCOHOL AND SUBSTANCE ABUSE ON HUMAN HEALTH AMONG STUDENTS conducted an important study that in the future will allow the introduction of preventive measures to the health of students.</p> <p>I recommend this study for publication after some minor revision.</p> <p>I would suggest in the abstract to rephrase the sentence "However, little is known about the effect of smoking, alcohol and substance abuse on human among students" in indicating the region/country.</p> <p>METHODS do not provide information on the calculation of sample size, so it is not clear to me how representative the sample of the study is. And this needs to be added. In my opinion, it is also necessary to add study inclusion criteria to METHODS.</p> <p>RESULTS does not contain information about comparing the responses of the M.B.B.S and non-M.B.B.S students. If METHODS focus on the fact that such groups were, then it is necessary to cite the presence/absence of statistically significant differences between M.B.B.S and non-M.B.B.S.</p>	
Optional/General comments	<p>Several tables with data and statistical coefficients might enhance the effect of the results of the study. Of course, this is to the discretion of the authors.</p>
