

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_75445
Title of the Manuscript:	Prediction of mortality and mechanical ventilation among critically ill patients of COVID-19 infection
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This paper is descriptive and is not adding any new suggestion for Covid-19 therapy. The patients' group is unbalanced: 34 females and 66 males, thus no statistical evaluation can be effectively done. Clinical criteria to ICU admission are not defined. Other pharmacological therapies (like desamethasone) are not considered. Tables are descriptive and lack any statistical evaluation.	
Minor REVISION comments	Paper needs profound English language revision	
Optional/General comments	The paper needs a serious major revision to be accepted. The patients' group need to be balanced and thus a rigorous statistical must be done. The conclusions are not in line with the data credibility.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
