PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> -The keywords of the Abstract have no relationship with the title/study -No mention and description of echocardiographic tool and features or other imaging diagnostic modalities of Myxoma in the introduction considering the use of the tool majorly in the study. - Figures 1-6 echocardiogram and histologic images lack labels which could have proffered better identification and description. - Standard measurement is in 3 dimensions not 2. So as to be able to determine the volume or weight. - A brief description of how the biopsies were taken or performed is omitted in the study. - Associated echocardiographic findings of Myxoma which could be of high suggestiveness of the mass lesion were not reported in the study. - The study being a Case Study can not throw more light into sex, age and location predominance of the disease considering the number of subjects in the study which are only 4. - How did the author determine the type of Myxoma the 4 subjects had? Did you do Gene study of the subjects to know which one is Sporadic or Familia? 	
Minor REVISION comments	Check spellings and Grammar	
Optional/General comments
