PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1- Patients' selection: Did the authors include patients with chronic inflammatory disorders other than those cited in the text? If so, it should be mentioned.</p> <p>2- Methods: The samples handling and treatment is unclear.</p> <p>3- In the results part, the authors did correlation studies between "cases" and "controls". However, the "controls" are not cited in the experimental design or in the experimental procedure. The authors should give more details about it.</p> <p>4- In the discussion section, The authors wrote that their measured cytokines' levels were higher than healthy individuals while citing references. However, the cytokines should be measured in the same conditions and the same population with the same kits. So, it should be rephrased.</p>	
Minor REVISION comments	<p>1- In the results section, the cytokines values have no units. They should add the units in the text.</p> <p>2- The figures legend (r, p) should be in the same position on the figures</p>
