PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>There is use of non-specific terms like: aged patients; elderly patients in abstract as well as conclusion of the paper. The study should either specify specific age range or refer to as geriatric patients or simply use the term: increasing age.</p> <p>p-value for correlation between FT3 and age under Result sub heading of Abstract needs correction.</p> <p>Methods section of Abstract needs to be revised. It simply mentions 127 patients but does not specify which patients are included.</p>	
Minor REVISION comments	<p>It is suggested to include SOFA score in the key words since it is an important parameter of the study and not mentioned in the title. Adding the same in key words will help in making the article more accessible through search engines.</p> <p>Some portions of the discussion are written in first person eg we observed; our patients. It is advisable to write the content in reported speech.</p> <p>While numbering the figures, Capital A, B, C & D have been used while in the text they are referred by small letters a, b, c & d.</p>	
Optional/General comments
