PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article is very informative and provide new insight especially for orthopaedic surgeon about individual morphometric variations of the cervical spine pedicles and facet joints by computed tomography among Indian patients. The results help the surgeon to prepare good pre-operative planning so can prevent any kind of neurovascular damage and enhance the prognosis of the treatment provided. I think it was suitable with the journal issue but remain need any revisions.	
Minor REVISION comments	The topic of the article is interesting because providing individual morphometric variations of the cervical spine pedicles and facet joints by computed tomography among Indian patients where useful for good pre-operative planning. The article can be better, the author should make the following changes/checks: <ol style="list-style-type: none"> 1. Please ensure the article is compliant with the journal guideline 2. Please pay particular attention to the following criteria which often missed: <ol style="list-style-type: none"> a. Who performed the CT scan? b. Patient perspective and consent c. History of the patient d. How profile of the patient? 3. Please make good imaging and table descripton 4. At the end of the article, please add recommendation related this topic 	
Optional/General comments
