PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This manuscript has selection bias as the authors stated that: (This study examines the clinical characteristics of fingertip injuries in adults treated at a tertiary medical hospital.), however they included 0 to 12 days age in their study and make conclusion related to workplace which is not possible with 0 day age of life Also, even they mentioned that they used SPSS in statistical analysis, they did not use any statistical tests and there are a lot of mistakes in some tables as shown in the attached doc I recommend not accepting this manuscript for publication in your esteemed journal	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
