PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>This paper outlines the methodology and background to a study that the authors aim to undertake where the impact of post-mastectomy exercises on lymphedema and range of movement will be investigated. The methodology appears sound and should be an interesting study to read once it is completed and published. The study appears to be a randomised study.</p> <ol style="list-style-type: none"> 1. Will the randomisation process only be based on a sequential numbering system or will consideration be taken also in terms of tumour stage, extent of lymph node evacuation, post-operation radiotherapy, age? 	
<u>Minor</u> REVISION comments	<p>The manuscript should be checked grammatically as well as for punctuation and spaces after full stops, i.e. before a new sentence is started.</p>	
<u>Optional/General</u> comments
