

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_76246
Title of the Manuscript:	SENSITIVITY OF PROPIONIBACTERIUM ACNES TOWARDS COMMERCIAL ANTI-ACNE FORMULATIONS
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1. Please see comments and tracked changes made in the manuscript.</p> <p>2. The usage of English is not really acceptable in this manuscript's current state, grammatical errors are found throughout this manuscript, and these errors can sometimes cause misunderstanding. I have corrected some but not all of the English in the manuscript. The authors should check again on the use of English in the manuscript.</p> <p>3. Some of the results are redundant to the study, for example: Figure 2, Table 1. Please consider removing these sections.</p> <p>4. A more detailed explanation should be made on Materials and Methods section. In addition, the use of English need to be checked to prevent misunderstanding. Please see the comments made in the manuscript. For example: Was the bacteria isolated from healthy volunteers or clinical patients? What is stock solution C1 and C2?</p>	
Minor REVISION comments	<p>1. The authors collected 3 <i>P. acnes</i> samples from the volunteers. Was the experiment performed on all three <i>P. acnes</i> isolates or performed only once?</p> <p>2. Please put labels on figure 4; for example, which well is A, B, C1, and PC? Which is plate 1 and which is plate 2?</p> <p>3. Discussion section: The authors should also discuss the following:</p> <p>3.1. Do these products contain antibiotics? If so, the authors should discuss why these products failed to inhibit the bacteria.</p> <p>3.2. Was the <i>P. acnes</i> sample isolated from healthy donors or a patient? This may affect the results as the isolates may have very different resistance profiles.</p>	
Optional/General comments	<p>1. Please see comments and tracked changes made in the manuscript.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
