PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>-The title of the manuscript should be modified to read "Mixed Ligand Complexes of some 3D metal(II) ions: Synthesis, Characterization and Antifungal Activity.</p> <p>- The synthesis of the metal complexes for all the metals should be discussed. The authors have only discussed the synthesis of the copper complex and no mention of the other metal ions.</p> <p>-The grammatical errors should be corrected as the spans the entire manuscript eg What is the meaning of "they were further characterized by satisfactory microelemental analysis, FTIR spectra as well as electronic spectra study".</p> <p>The references are too old. The latest version is 2013 ie 8 years ago. The authors should cite some most recent works to support their claims. So much work has been done in the area of thiosemicarbazone. This will give the work a more balance references.</p> <p>-it is recommended that the authors should use chemdraw formulae for the ligand and complexes i.e generate ELEMENTAL ANALYSIS, M/H+,CHEMICAL FORMULAE ETC.</p>	
Minor REVISION comments		
Optional/General comments	Major revision is required
