PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It seems like a very interesting topic to me, but the article needs to be written better, it is presented as a research protocol and it should be presented as an article. For example, the results session is not clear and is mixed with the discussion. Ethical action is not clarified. References are presented in different styles (APA, Vancouver, other) and must be unified, some are mentioned in the text and some are not. Its publication is interesting, but after a better writing.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i> Ethical approval must be clarified. Despite not being a risk study, it should have ethical approval and informed consent. The text does not clarify this.
