PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Beautiful thoughts on TBM. Based on my observation, I will like to suggest this:</p> <p>I discovered that the report was based on an isolated case of a " One-year old boy". I think we need a broader perspective on this and in so doing the use of statistical tools like tables, charts and graphs will help to paint a better picture of what the research is really about. I believe with this improvement this paper will be more scholarly than its present form.</p>	
Minor REVISION comments	<p>"he has not improved after taking treatment and the patient is on a ventilator as well, we nasogastric tube also. I was receiving treatment and will continue to do so until the end of my care."</p> <p>As captured in your line 7 -9. The use of He and I seems to be trivializing the report. I will suggest a recast with less personal references.</p> <p>Page 2, line 3-5, I quote "They had good relationships with their neighbors, and their family members had good relationships with each other. Also, other relatives. "</p> <p>The statement in itself is not bad because I suppose the author hope to communicate the cordiality between family members with their neighbours. But frankly speaking I think its irrelevant in the context of this research.</p>	
Optional/General comments
