PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. The author has focused on the risk factors of NCDs specifically overweight and obesity instead of dietary habit and university students in the introduction part and discussion.2. The author should do intensively literature review to improve the work and avoid long paragraph with single citation.3. The author should improve the part of methodology by elaborating the means of data collection eg anthropometric measurement.4. I am worried if one month intervention is enough to see the behavioural changes on dietary habit.5. The author did not discuss the biological mechanism mainly compared the findings with findings from other related studies.6. The comparison should include different studies and not a single study only.	
Minor REVISION comments		
Optional/General comments		

Review Form 1.6
